Dear Dr. Windholz:

I am glad to confirm the data given to you by Dr. Campbell concerning his analytical training. I suppose that he would need more supervised work and also more technical seminars. I have no judgment as to whether he needs more personal analysis, because I do not know how he has developed since he left New York.

At any rate, I feel like congratulating you on acquiring a member as intelligent and active as Douglas Campbell is.

If there are any more questions in this matter, please feel free to ask me.

Sincerely yours,

Karen Horney
